Spring 2016 Seminars

All seminars are held in the Pearson Chemistry Building, 62 Talbot Avenue in Medford, Room P106 at 4:30 pm unless otherwise noted. Refreshments will be served thirty minutes prior to the seminar in P319. For further information please contact Debbie D’Andrea at (617) 627-2649 or by email debbie.dandrea@tufts.edu

Visitors Are Welcome

January 26  Prof. Jim Van Deenter, Tufts University, Chemical and Biological Engineering
“Protein Engineering and Genetic Code Manipulation in Search of New Therapeutics”

February 2  Prof. Jacob Hooker, Massachusetts General Hospital/Harvard Medical School
“A Tale of Two Radiotracers: Neuroepigenetic & Neurogenesis Imaging using PET”

February 9  Prof. Wenyu Huang, Iowa State University
“Control Heterogeneous Catalysts for Superior Catalytic Properties”

February 23  Prof. Adam Braunschweig, University of Miami
“4D Nanolithography: Addressing the Surface Chemistry Bottleneck”

March 1  Prof. Kate Carroll, The Scripps Research Institute
“Cysteine-Mediated Redox Signaling: Chemical Tools for Biological Discovery and Beyond”

March 8  Prof. Joshua Price, Brigham Young University
“Predictive Structure-based Guidelines for Identifying Optimal Protein PEGylation Sites”

March 29  Prof. David Christianson, University of Pennsylvania
“Structural Biology and Chemistry of Histone Deacetylases in Human Disease and Drug Discovery”

April 5  Prof. Kirk Schanze, University of Florida

April 12  Tishler Award Lecture
Prof. Donald Ingber, Wyss Institute at Harvard

April 26  Prof. Daniel Killelea, Loyola University Chicago
“Subsurface Oxygen on Catalytically Active Metals”
