"Bio-Inspired Design: Lessons from the Human Glycome"
- February 6** **Revati Kumar, Ph.D.**, *Louisiana State University*
"Developing Robust Force-Fields for Complex Environments"
- February 13** **Matthew Shoulders, Ph.D.**, *Massachusetts Institute of Technology*
"Modulating Proteostasis and Illuminating Viral Evolution"
- February 20** **Erin Iski, Ph.D.**, *University of Tulsa*
"Visualizing Nanoscale Surface Chemistry: From Ultra-High Vacuum to Electrochemical Environments"
- February 27** **Nicholas Yoder, Ph.D.**, *ImmunoGen, Inc.*
"Heavy Medicine: The Chemistry of Antibody-Drug Conjugates"
- March 6** **James Rusling, Ph.D.**, *University of Connecticut*
- March 27** **Kyle Plunkett, Ph.D.**, *Southern Illinois University*
"Synthesis of CP-PAH Based Electron Accepting Materials and Highly-Ordered Polymer Nanostructures"
- Wednesday*
April 4 *Seminar to be held at 12:00 pm in P106*
Jeffery Byers, Ph.D., *Boston College*
- April 10** **Steven Corcelli, Ph.D.**, *University of Notre Dame*
"Dynamics and Vibrational Spectroscopy of Molecular Reporters in Ionic Liquids"
- April 17** **Joseph Barchi, Jr., Ph.D.**, *Center for Cancer Research, National Cancer Inst.*
- April 24** **Poul Petersen, Ph.D.**, *Cornell University*
- May 1** **Rajeswari Kasi, Ph.D.**, *University of Connecticut*
