Tufts Chemistry Department Seminars

Spring 2020

January 22  
**Prof. Danielle Dube**, Bowdoin College  
Tufts Monday  
“Chemical Tools to Discover and Target Bacterial Glycoproteins”

February 12  
**Prof. James L. Skinner**, University of Chicago  
“Anomalies in Ambient and Supercooled Water: Is there a second critical point lurking nearby?”

February 19  
**Prof. G. K. Surya Prakash**, University of Southern California  
“A Physical Organic Chemist's Journey into Fluoroalkylation Chemistry”

March 3  
**Dr. Peter Senter**, Seattle Genetics  
Tues | 4:30pm  
“Antibody-Drug Conjugates for Cancer Therapy: From Early Stage Research to Clinically Approved Drugs”

March 4  
**Prof. Paul J. Bracher**, Saint Louis University  
“Why Did Life Choose Potassium over Sodium”

March 10  
**Prof. Jacqueline K. Barton**, California Institute of Technology  
2020 Max Tishler Award Lecture  
“DNA-mediated Signaling”

March 12  
**Prof. Hien Nguyen**, Wayne State University  
POSTPONED  
"Specific inhibition of heparanase by glycopolymers for cancer and diabetic therapeutics"

March 25  
**Prof. Jennifer Prescher**, University of California, Irvine  
POSTPONED  
"Spying on Cellular Communication with Chemical Tools and Noninvasive Imaging"

April 1  
**Prof. Pavel Nagorny**, University of Michigan  
POSTPONED  
“TBA”

April 8  
**Prof. Jean-Sabin McEwen**, Washington State University  
POSTPONED  
“TBA”

April 29  
**Prof. John Tsavalas**, University of New Hampshire  
POSTPONED  
“Simplifying the Design of Anti-freeze Protein Mimicking Polymers”
